U-100

With the increased popularity of computer as source, this U-100 USB Interface allows owners of digital-to-analogue converters or CD players with digital inputs to enjoy listening to digital music sources from a computer (Windows or Mac) via USB connection, which is USB 1.1 and 2.0 compliant. No custom USB drivers or software programs are required. This device simply converts the data of music files from your computer to SPDIF signal, which then feeds your DAC. The U-100 USB Interface utilizes the same Tenor TE7022L controller ship as that employed in highly acclaimed Luxman DA-200 digital pre-amplifier.

SPECIFICATIONS

Item	Value
Input Bit Depth	16 bits and 24 bits/32kHz, 44.1kHz, 48kHz, 96kHz
Digital Input	USB 1.1 and 2.0 compliant
Digital Outputs	S/PDIF coaxial digital x 1 Toslink optical digital x 1
Digital output level	0.5V pp
Sampling Rate	44.1kHz, 48kHz, 96kHz
Phase error	0.02°
Total Harmonic Distortion	0.0002%
